## Installing the Android Application through Application APKInstaller

1. Install any File Manager Application like APKInstaller on Android device.
2. Connect the phone/device to PC using a USB cable.
3. Copy FundooTots.apk from the PC to the device's SD card.
4. Open file manager application on the device and navigate to the FundooTots.apk in SD card and select it.
5. Follow the instructions to install FundooTots.

## Installing the Android SDK Android Application

1. Download and install the Android SDK from the below link.
    https://developer.android.com/sdk/index.html
2. Install Google Play services and Google USB Driver from SDK Manager -> Extras
3. Modify your Android phone/device settings to allow instructions from other sources. Go to "Settings", select "Application settings" and enable "Unknown Sources". Also in "Settings", select "SD card" and "Phone Storage" and enable "Disable use for USB Storage".
4. Open the Windows Command prompt and type "adb install path\FundooTots.apk".
5. FundooTots application is ready to use.
